

HUMANITARIAN ORGANISATIONS

Transport of equipment and material on humanitarian duties :
handling of equipment for emergency and disaster-relief duty.

Most famous organisations as Red Cross and United nations utilize the hook lift concept for transportation of various kind of bodies :

- Platform for pallets transportation
- Container for waste collection
- Platform for water and fuel tanks
- Container for troop transportation
- Dump bodies
- Cooling boxes
- First aid equipments
- Hospital shelter
- Platform with crane mounted

The wide range of PALIFT Hookloaders offers to these organisations the possibility of investing in a few numbers of trucks for various applications.
