### **PALIFT HOOKLOADERS in BAHRAIN**

The first 2 PALIFT Hookloaders T20 delivered to Bahrain are mounted on Nissan Diesels, 3 axles truck, GVW 26 tons.

The customer GCCC - Golf City Cleaning Company - is the biggest company in Waste management at Manama, the capital city of Bahrain.

The PALIFT units are the very first hookloaders on the market of Bahrain. Up to now, all companies in waste business and also GCCC, were handling the waste disposal with Skiploaders only.

Since beginning of 2009, GCCC has extended their fleet with two PALIFT hookloaders and six compactor containers. The Fleet manager at GCCC is very confident about the hookloader concept and they are assured, the new conception will rapidly fulfil their expectations.

Before the handover, all trainings in technical, safety, operator, service / maintenance and driver items were done at Almoayyed and GCCC.
