## FORMING BUSINESS

KNUCKLE BOOM + JIB CRANES

KNUCKLE BOOM CRANES

LONG BOOM CRANES

Forming solutions from PALFINGER are designed specifically for the North American market, with three common crane styles to fit your specific needs. Select from our comprehensive line of knuckle boom + jib cranes, knuckle boom cranes and long boom cranes. Each offer significant power and strength while maintaining smooth operation and precise placement of your forming cages.

We understand that concrete forming is a demanding business – and it's even more demanding for the cranes. With PALFINGER, you can expect cranes that are durable, powerful and fast. They easily adapt to each job site and provide excellent reach to meet your requirements. When forms are set more efficiently thanks to the speed and control of your PALFINGER crane, you'll see higher productivity amongst your fleet and lower operating costs for your business.

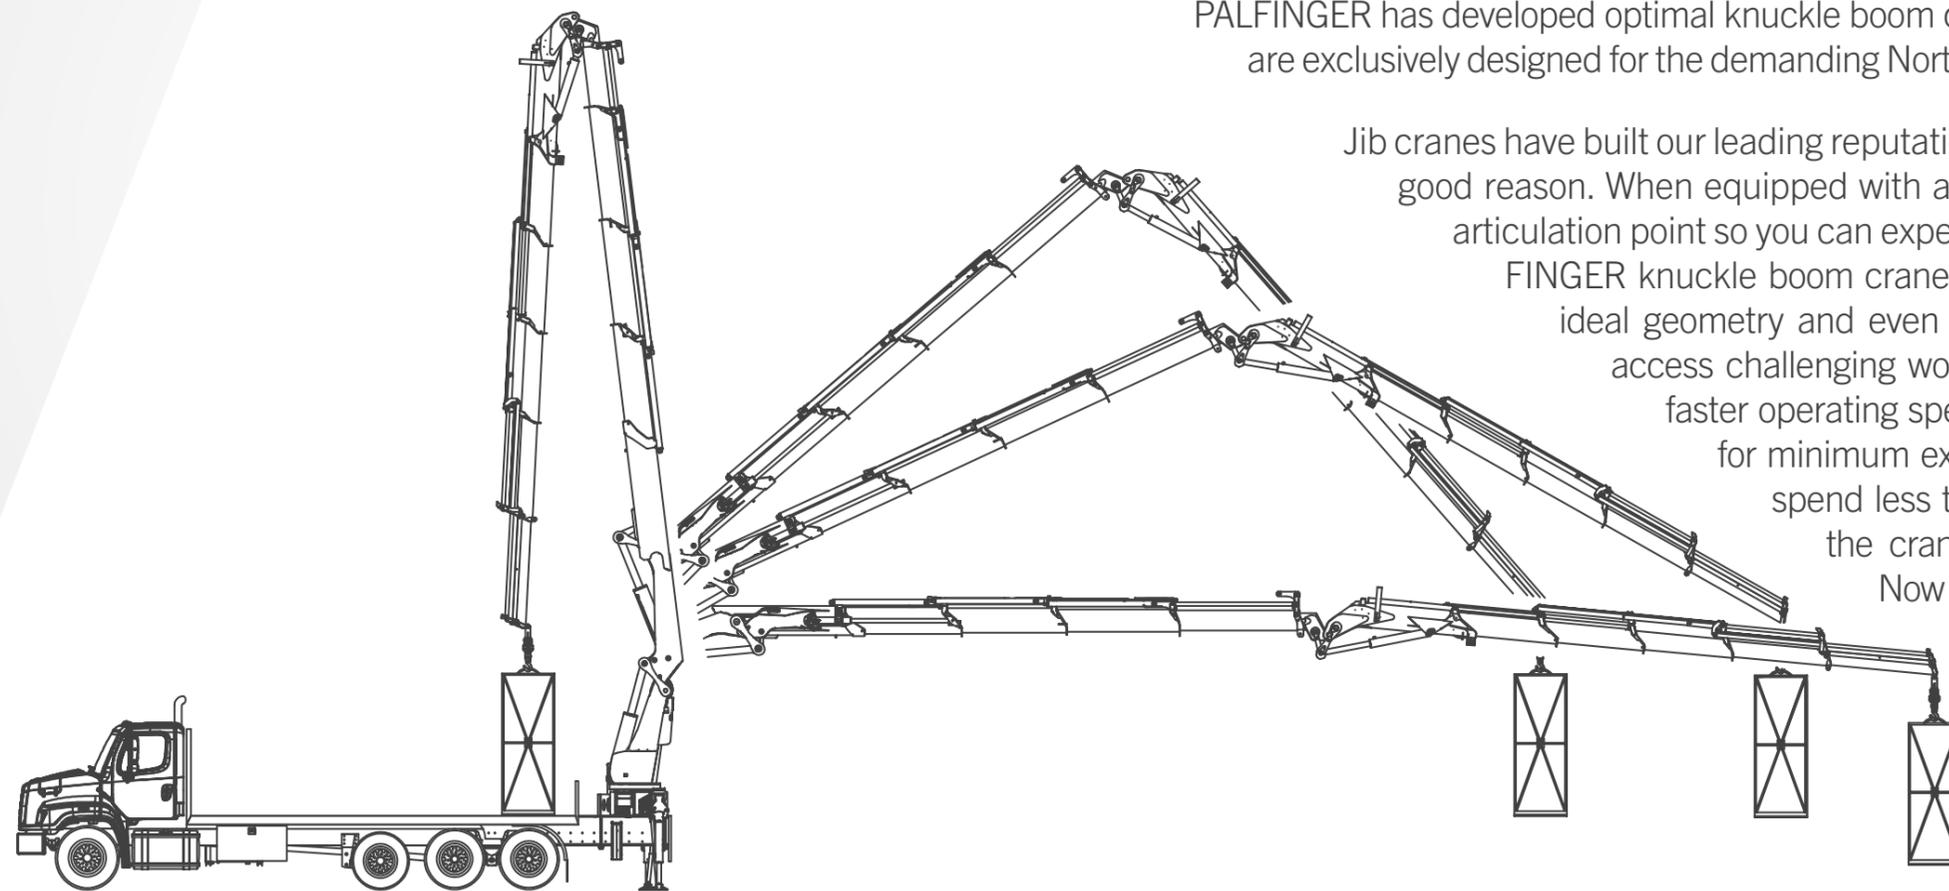

# PALFINGER ON THE JOB FORMING BUSINESS

**KNUCKLE BOOM + JIB CRANES**

KNUCKLE BOOM CRANES

LONG BOOM CRANES

PALFINGER has developed optimal knuckle boom crane + jib configurations that are exclusively designed for the demanding North American forming market.

Jib cranes have built our leading reputation within this industry and for good reason. When equipped with a fly-jib, there is an additional articulation point so you can expect all of the benefits of a PALFINGER knuckle boom crane and then some! That means ideal geometry and even more flexibility on the job to access challenging work sites, combined with even faster operating speeds. Jib cranes are designed for minimum extension use, so your fleet will spend less time extending and retracting the crane and more time working – Now that's efficiency!

KNUCKLE BOOM + JIB CRANES

**KNUCKLE BOOM CRANES**

LONG BOOM CRANES

PALFINGER has a broad offering of mid-size and large knuckle boom crane models to match your concrete forming needs. They are fast, smooth, precise and equipped with our market leading safety systems, so you can expect nothing less than high performance.

PALFINGER knuckle boom cranes are a great solution for your business because they offer quick set-up times and excellent geometry. This means that no time is wasted at each delivery – the crane is work ready in minutes – and with added flexibility, it will easily set forms even with obstacles on the job site. Choose to handle your forms via boom tip hook, or cranes can be fitted with hydraulic winch.

KNUCKLE BOOM + JIB CRANES

KNUCKLE BOOM CRANES

**LONG BOOM CRANES**

Long boom cranes are strong and durable concrete forming solutions that operate with speed, precision and power. Unlike knuckle boom and jib cranes, long boom cranes are stored over the truck bed and they don't fold up, so they're easier to operate. Simply lift the crane up out of the boom rest and you are ready to work! For smaller companies with low duty cycles, our long boom cranes are cost efficient solutions to benefit your fleet.

**ABOUT US**

## **PALFINGER NORTH AMERICA** NIAGARA FALLS, CANADA

A market leader in the design and manufacturing of knuckle boom cranes, Palfinger North America began in Niagara Falls, Canada, where a crane sales and service facility was established in 1989. Steady growth allowed for facility expansions to accommodate Crane assembly and improved service and spare parts delivery (2002-2005), in addition to a new testing hall and increased facility space (2008). The product portfolio has expanded to include PALFINGER truck-mounted forklifts, EPSILON timber/refuse loaders and aerial work platforms.

Facility highlights include:

- Crane assembly
- Spare parts center
