DESCRIPTION

Lightweight and compact double articulated aerial platform for working in confined spaces, installed on a 3.5 t lorry. The double pantograph ensures great versatility and the ability to overcome obstacles at height.

- Easy-to-use hydraulic controls
- Single stabilisation for quick positioning
- Palfinger-certified KTL cataphoresis treatment of all metalwork

STANDARD

- Mechanical collision protection between cab and boom
- Aerial centring display for machine closure
- Hydraulically rotating basket 90° right + 90° left
- Machine operating hour meter
- Mouth-extension protection cap

Prior sale and changes reserved!

Print date: Dec 5, 2025, 4:02:36 a.m.

- Air/water line from the column to the basket
- Enlarged distribution plates to be placed under the stabilisers with relative housings on the platform
- 12V socket on the basket
- 230V/16A or 110V/16A electrical socket in the basket
- Cataphoresis coating, PALFINGER patented KTL system

MAIN ACCESSORIES

- Plastic storage box under the floor
- Side frame fairings
- Fibreglass basket to replace the standard aluminium one
- 12V electric pump for emergency descent
- 230V/16A or 110V/16A electric pump with quick couplings
- Inclinometer with audible and visual alarm for aerial working conditions
- 1000V insulation with fibreglass basket
- Fixed lamp holder in turret
- Arm extension protection brushes
- 200 mm high folding side rails on 2 sides

PRODUCT

Manufacturer	PALFINGER	Max. height of work	19,6m
Model	P 200A-R	Turret rotation	360°
Construction year	2025	Basket capacity	230 Kg
		Basket material	ALU

TRUCK

Truck manufacturer	Iveco	Wheel base	3450
Construction year	2025	Emmission standard	EURO 6
Drivers cabine	B	Axes	4x2
		Gross vehicle weight	3,5 TON
