CONTRACT NUMBER: PALDRIVE 402

NEW

IN PRODUCTION

SPECIFICATION

Crane: PK 135.002 TEC7

- Hydraulic 8-fold extension
- High-speed extension system with return oil recovery
- Swivel range endless
- Hydraulic support leg extension (max. support width 10.000 mm)
- Additional hydraulic support (support width ca. 8.500 mm)
- Support legs can be swiveled hydraulically through 180 °
- Paltronic 150
- HPSC + LOAD
- Palcom P7 radio remote control /9 functions with cross levers

- Painting RAL3020
- Working lights on the articulated arm and on the fly-Jib
- Hose equipment for two additional devices including quick coupling (multi-faster)
- 3,5to- cable winch on the main arm (hydr. foldable), cable length: 90m
- inclusive 1Stran rope Equipment on the Fly-Jib
- Synchron control rope winch (SRC)
- 11to +18to load hook

Accessory: PJ190E (additional knuckle arm)

- Hydraulic 6-fold extension
- Can be folded upwards hydraulically by 25 °
- Applications with additional devices possible (e.g. gripper, rotator ...) including multi-faster
- PJM020 MFA-JIB (2 manual extensions)
- Preparation for EN280- workman basket operation

Design Platform:

- Inner dimensions: 2.480 x 4.100 mm
- Design front wall: height 1.400 mm
- Side- and rearwalls height: 600 mm
- Foldable steps at 2 positions
- Platform floor made out of Aluminum profiles

Chassis: MAN TGS 35.520 8x4H-6 BL

- 520 HP , max. 2.650Nm

-
- Automatic drive, MAN TipMatic 12.28 OD
 - MAN Hydro-drive at the 2nd Axle
 - MAN 20tons frame reinforcement provides better Crane performance above the Cab area
 - Leaf suspension on front axles, air suspension on rear axles
 - Fuel tank 390l / AD-Blue tank 35l
 - Tyres driven axle: 315/80R22,5
 - Tyres 1st, 2nd & 4th axle: 385/65R22.5
 - Cabin colour: RAL9016 traffic white / chassis colour: RAL9011 graphite black

LIFTING CAPACITY MEETS LOADING CAPACITY

LIFETIME EXCELLENCE

LIFETIME EXCELLENCE

PALFINGER loader cranes are convincing due to their superior life-cycle performance. They are the most economical and also the most reliable over the entire product life. From solution finding to resale.

- Better solutions
- Better efficiency
- Better ergonomics
- Higher availability
- More reliability
- Better ecology
- Higher serviceability
- Higher value retention

PERFECT WORKING EQUIPMENT

- Gross vehicle weight of 32 t – fully equipped with 2500 to 3000 kg payload capacity
- Gross vehicle weight of 40 t – fully equipped with 8000 kg payload capacity
- Very stiff and light boom system thanks to P-Profile
- High working speed thanks to double circuit control
- Possible choice between three fly-jibs
- Hydraulic lifting height with fly-jib of up to 38 meters
- More efficiency with fly-jib due to DPS-Plus and DPS-C
- High operator friendliness thanks to radio remote control
- More power thanks to S-HPLS
- Maximum utilization of the working range thanks to extended HPSC

FIRST-RATE IN DESIGN AND PERFORMANCE

15 Highlights

Continuous slewing system
Unrestricted movement

More efficient in operation due to faster loading cycles, since the crane can be slewed over a shorter distance. The crane works more efficiently and faster.

Power Link Plus
High variety of uses

With the 15 degree reverse linkage system on the knuckle boom and the 25 degree reverse linkage system fly-jib, you can reach through low door openings and also work inside buildings. Heavy crane work – even in difficult conditions.

Extension boom system
Excellent stability, even at a height

Thanks to the use of high-strength fine-grain structural steels in combination with a new extension boom profile, stiffness is increased and weight reduced.

HPSC-Plus
Maximum utilization of the working range

The modular system HPSC-Plus offers three modules expanding HPSC. Thanks to load detection, length measurement system or stabilizer force detection, lifting capacity can be maximized.

S-HPLS
More lifting power when it counts

S-HPLS is one of the most important functions of the PALTRONIC. It is a fully automatic system for increasing lifting power. The lifting power and crane speed can be continuously adapted to suit requirements.

PALcom P7
Communication with the operator

The new PALcom P7 features a modern, ergonomic design. The centrally located knob „PALdrive“ and a large colour display enables easy and safe operation.

Rope winch
Additional possible applications

A 3.5 ton rope winch is available on the main boom or knuckle boom, featuring a high lifting capacity.

Functional design
Practical and attractive

Robust plastic covers protect crane parts against dirt and damage. Improved looks and increased operational comfort – throughout the entire lifetime.

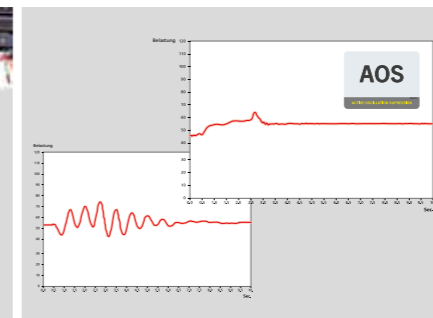

Soft Stop function
Improved comfort and safety

The Soft Stop function is an electronic limit position damper. It causes gentle braking of all crane movements before the limit position is reached. Hence, jerky movements and load impacts can be avoided. The crane can be operated more gently and precisely.

SRC and RTC
More comfort in rope winch operation

SRC (Synchronised Rope Control) maintains a constant distance between the pulley head and the hook block, while RTC (Rope Tension Control) is automatically controlling the rope tension. Two systems, which are particularly valuable in terms of operator friendliness and efficiency of operations.

AOS
Maximum precision and safety

The active oscillation suppression system prevents „post-oscillation“ in the event of rapid braking or load changes. The stress peaks on the extension boom system are reduced and material fatigue and wear are minimized. This increases the resale value.

DPS-Plus / DPS-C
More efficient fly jib operation

The Dual Power System allows multiple uses of the crane both for large outreaches as well as for heavy load operation.

P-FOLD
Perfect set-up by fingertip control

The new assistance system makes folding and unfolding an easy job for the crane operator. This significantly increases operator comfort and prevents costly damage.

Workman basket
Maximised functionality

With the aid of the workman basket, additional duties like installation and maintenance work can be performed with the crane.

MEXT and WEIGH
Systems for easy handling

MEXT includes mechanical extensions into the overload protection while WEIGH allows to weigh loads. The result: lower effort for the operator in daily working tasks.

EUROPEAN DESIGN BODYWORK

THE PLATFORM

WELL-DESIGNED AND VERSATILE

The platform with integrated cutouts for the mudguards is attached laterally to the subframe to keep the loading height as low as possible. The PALFINGER design front wall is not only convenient but also a real eye-catcher.

FUNCTIONAL DESIGN

The attractive front wall includes a full-length storage box, hooks for hanging straps and 4 LED working lights. A robust aluminium floor and lashing points in the border profile guarantee carefree transport for many years. Access to the loading area is possible via folding steps integrated in the side walls.

EVERYTHING TIDIED UP

Crane equipment and load handling devices can be safely stored in the aluminium toolbox with plywood body. The vehicle batteries are installed easily accessible in another box. Heavy chains are best stowed in the trays on the additional stabilizers, where they can simply be picked up with the crane.

WELL ILLUMINATED

LED working lights, LED reversing lights and LED environment lighting provide optimal illumination around the vehicle. Flashing lights at the rear and in the front of the vehicle attract further attention.
