SPECIFICATION

VEHICLE HANDOVER WITHIN 14 DAYS FROM OFFICIAL ORDER.

Bauma 2022 DEMO unit → used Chassis with new PK 1050 TEC

PK 1050 TEC

lifting moment	95,0 mt
max. outreach	32,4 m
max. lifting capacity	30.000 Kg
swivel range	endless
operating hours	10 hours

MAN TGS 35.510 8X4H-6 BL

construction year	2022
main Axle distance	2.980 mm

Prior sale and changes reserved!

Print date: May 20, 2024, 11:10:59 PM

power	510 Hp
first registration	May 2023
registrations	1
Mileage	25.750 Km
working hours	1.050 hours

MCC-INSTALLATION

Platform length	4,6 m
loading height	1,2 m
dead weight	28.400 Kg
max. payload	3.600 Kg

PRODUCT

Construction year	2024	Outreach / Lifting power	32,4 m / 1.020 Kg
--------------------------	------	---------------------------------	-------------------

TRUCK

Truck manufacturer	MAN	Dead weight	28.400 Kg
Construction year	2022	Mileage (km)	25.750 Km
Drivers cabine	TM	First registration	Mai 2023
Emmission standard	EURO 6	Payload	3.600 Kg
Axes	8x4	Payload category	<6t
		Construction	Heavy duty crane

PK 1050 TEC G

HYDRAULIC & TECHNICS

- Hydraulic 8 extension
- High-speed extension system with return oil recovery
- Swivel range endless
- Hydraulic support leg extension (max.support width 8.800mm)
- Support legs can be swiveled hydraulically through 180°
- Additional hydraulic support (support width ca. 8.500 mm)
- Hose equipment for two additional devices
- 2,5to cable winch on the main arm (hydr. foldable), cable length: 65m
- 2 Stran rope Equipment on the Crane

ASSISTANCE SYSTEMS

- Paltronic 180
- HPSC + LOAD
- CPS (cabin protection)
- P-FOLD
- Smart-control
- Weigh function
- leveling assistant
- Memory function
- AOS
- SRC
- RTC

EQUIPMENT

- Palcom P7 radio remote control /8 functions with linear levers
- Working lights on the articulated arm
- 11,5to & 32,0to load hook
- Painting RAL3020
- hydraulic oil tank 350 l

PJ150 E

CONFIGURATION

- Hydraulic 6 extension
- High-speed extension system with return oil recovery
- Can be folded upwards hydraulically by 25°
- Applications with additional devices possible (e.g. gripper, rotator ...)
- 1Stran rope Equipment on the Fly-Jib
- Working light at the fly-Jib

INSTALLATION

- installation: design edition
- low built platform + design frontwall
- measurement platform in the clear: 4.600mm x 2.480mm
- loading height: 1.200mm
- trailer coupling: ROCKINGER Typ 400 G 150A
- reverse camera
- 2 reversing lights
- 8 working lights
- 2 pcs. of heavy duty chain-trays (additional stabilizers)

MAN TGS 35.510 8X4H-6 BL

- 510 Hp, torque max. 2.600 Nm
- Automatic gearbox: MAN Tipmatic 12.28 OD + PriTarder
- leaf suspension at 1st and 2nd axle
- air suspension at 3rd and 4th axle
- Fuel tank 390l / AD-Blue 35l
- Tires 1st, 2nd & 4th axle: 385/65R22.5
- Tires driven axle: 315/80 R22.5
- Cabin colour: RAL9016 / chassis colour: RAL9011
- Cabin type: TM - the comfortable
- auxiliary heating: 4kW
- Mediasystem Professional (12,3 Inch)
- Multifunctional steering wheel

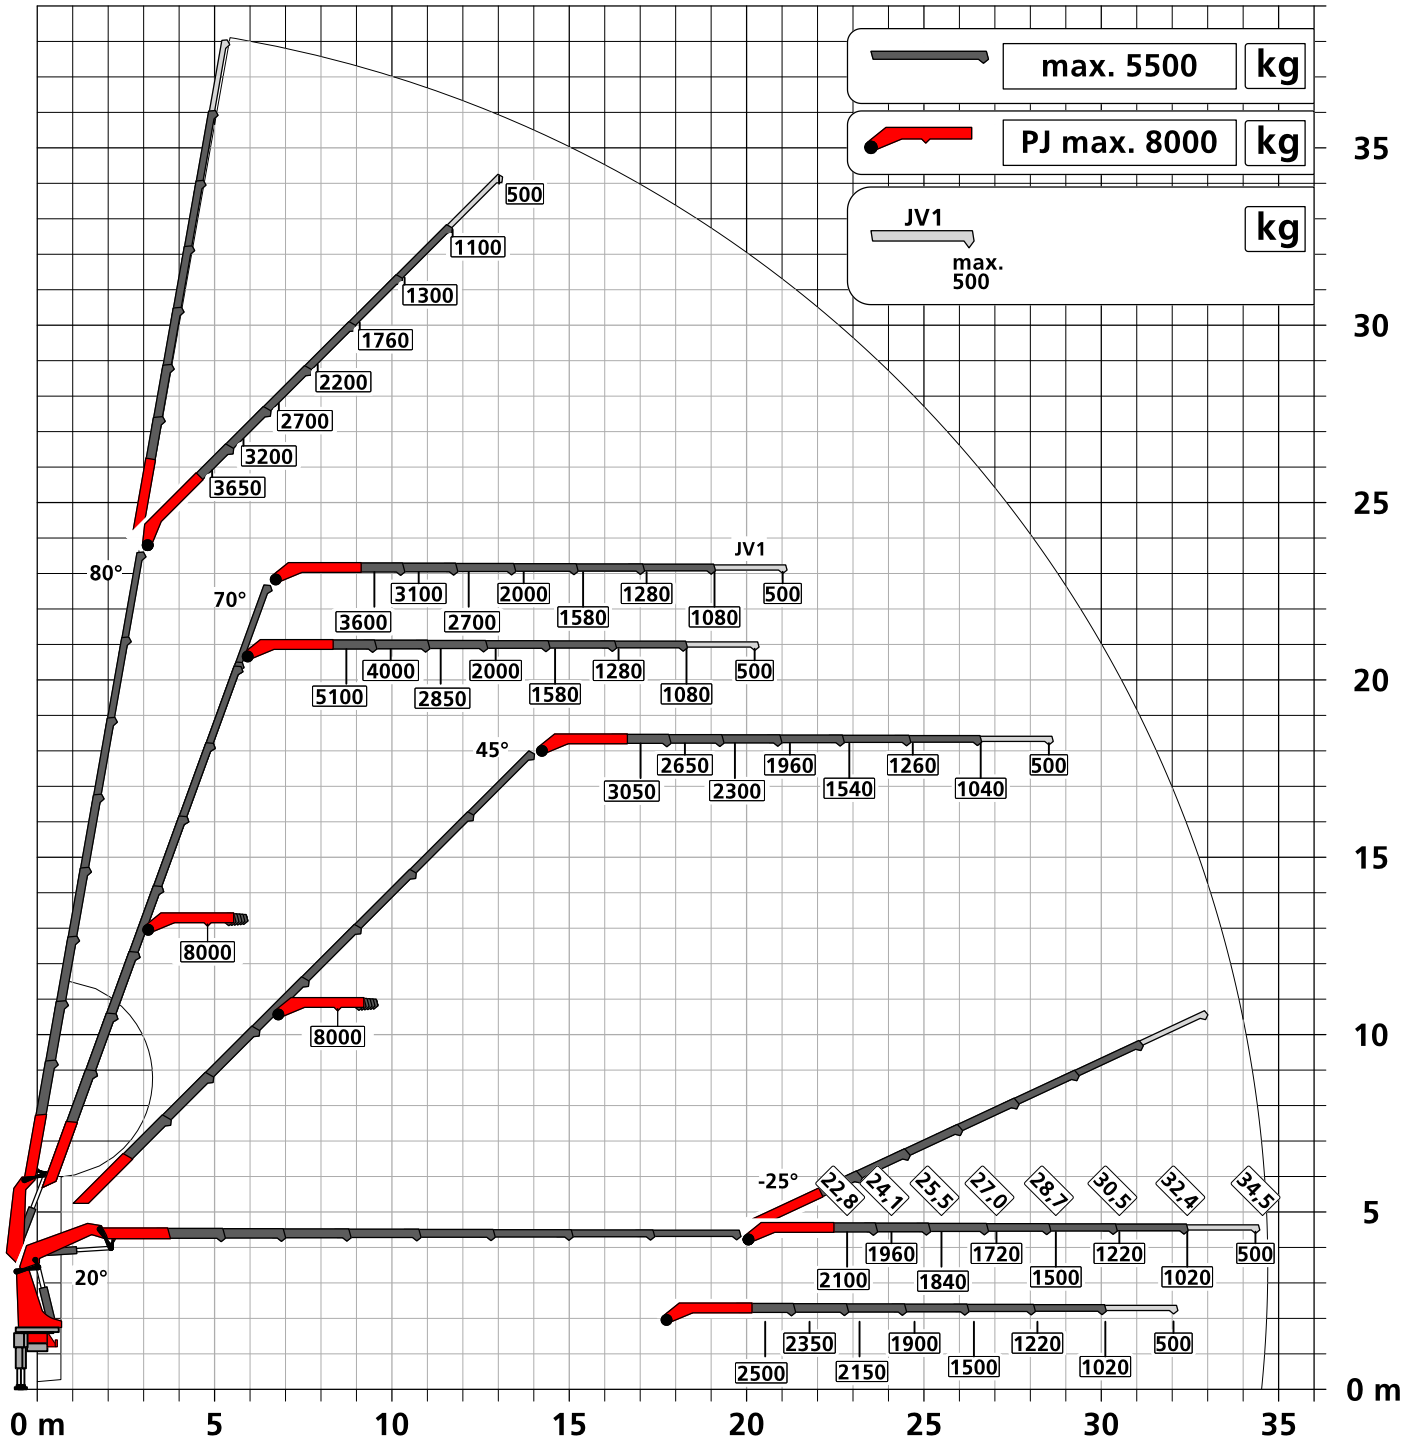

Traglastdiagramm PK 1050 TEC G PJ150E JV1 DPS-C

PK 1050 TEC

EVERY CRANE OPERATOR'S DREAM

PK 1050 TEC

THE NEW REFERENCE IN THE 100 METER-TON CLASS

The PK 1050 TEC is an absolute highlight in the heavy-duty crane segment. Featuring a fly jib and enormous lifting capacity of 95 meter-tons, it stands out in its meter-ton class with an unprecedented outreach of 37 meters.

This crane is also extremely fast and very sensitive in operation. It is also a premiere for the control of the crane tip **SMART CONTROL**: The PK 1050 TEC sees it integrated into a 100-meter-ton crane for the first time and, together with the **MEMORY POSITION** and the **LEVELING ASSISTANT** functions, makes the crane operator's work even smarter and, above all, easier. With **DUAL POWER SYSTEM CONTINUOUS (DPS-C)**, the lifting power is continuously maximized in every position, because the intelligent system knows exactly where the crane tip is at any given moment. The PK 1050 TEC is the ideal choice, whether for working at great heights in the steep position or horizontally through garage doors.

P-PROFILE

Lightweight construction in perfection

The polygonal or teardrop-shaped P-profile is the signature feature of the PALFINGER TEC-range. The torsion-resistant profile shape ensures a torsionally stable and at the same time lighter extension boom system. This results in a lower crane weight with higher performance. The extension booms also slide much better regarding the special shape and the self-lubricating plastic packages. This also means a particularly low-maintenance. The P-profile thus enables more efficient use in everyday work.

LEVELING ASSISTANT*

Up to 80 % time savings when leveling the vehicle

The LEVELING ASSISTANT simplifies the stabilizing process overall by optimally leveling the vehicle. The process itself takes place through pulsating movements of the stabilizer cylinders. With just one lever movement on the remote control, optimal leveling is achieved by pulsating movements of the stabilizers. In order to achieve the best possible vehicle inclination for each individual application, the operator can choose between two versions, „steep position“ or „HPSC“.

HPSC-PLUS*

Maximum utilization of the working area

HPSC-Plus offers three modules to expand the proven stability system HPSC. Due to load detection (LOAD), length measurement system (GEOM) or stabilizer force detection (FSTAB) the lifting capacity of the TEC-range can be fully utilized at every point on the stability curve, regardless of whether space conditions are tight or not.

DUAL POWER SYSTEM (DPS-P / DPS-C)*

Full lifting power for efficient fly jib operation

The Dual Power System enables a significant increase of lifting capacity on the fly jib. The system shows its strengths in the TEC crane with fly jib, especially with large outreach, and increases the areas of application. While DPS-Plus recognizes two positions of the last extension boom and uses two pressure ranges, DPS-C can continuously select the pressure range that suits the respective position and get even more lifting power out of the TEC crane at any time.

P-FOLD*

Perfectly ready for use with just one lever

The P-Fold assistance system makes folding and unfolding a breeze for the operator. With just one lever movement, the TEC crane can be laid apart and folded up again quickly and without damage. This reduces set-up time to a minimum. The RTC (Rope Tension Control) system is an ideal addition if a rope winch is existing.

SMART CONTROL*

Precise crane tip control with just one lever instead of individual ones to control functions

SMART CONTROL is the innovative and easier way to control the crane tip horizontally, vertically and diagonally in all directions with just one lever movement. The system recognizes by itself heavy loads on the hook and automatically compensates the deflection of the crane. This means that precise work can be carried out even more comfortably. The fly jib can be controlled as usual. This makes controlling a crane much easier.

MEMORY POSITION*

Storage of up to 4 crane positions for more efficient work

With MEMORY POSITION, the operator can save defined crane positions including fly jib and rope winch for each operation and approach them exactly by using only one or two levers. Regardless of whether previously saved without a load and then start up again with a load, the system automatically compensates for the respective deflection. Positions that are often the same, like above the loading area of the truck, can also remain saved and do not have to be set new each time.

CONTINUOUS SLEWING SYSTEM

Unrestricted Movement

The continuous slewing system offers full flexibility and efficiency in any operation. This feature enables faster unloading, as the crane can be slewed to the desired position using the shortest possible route. This means working in almost any direction without having to reposition the vehicle.

SRC & RTC*

More comfort in rope winch operation

The Synchronized Rope Control (SRC) maintains the distance between pulley head and hook blocks constant while the crane is being operated. In this way, the operator always has the certainty that the distance to the load remains constant. The Rope Tension Control (RTC) extends operator comfort by automatically controlling the rope length at any time and at any position. The combination of these two systems significantly increases the comfort for the operator and also increases the efficiency of each rope winch operation.

AOS*

Oscillation-free work

Active Oscillation Suppression (AOS) is a patented assistance system from PALFINGER, which compensates vibrations and shocks in the vertical direction during crane operation. This reduces backswing to a minimum and ensures a consistently high standard of safety when transporting a load or emptying big bags.

MEXT & WEIGH*

Extended gain in safety and comfort

Thanks to the assistance systems MEXT & WEIGH, working is even safer and more comfortable. MEXT monitors the mechanical extensions and integrates them into the overload protection. On the one hand, the out-range is increased and, on the other hand, the maximum load capacity is adapted to the respective extension. WEIGH enables the load to be weighed directly at the crane tip. It is also possible to summarize the last ten loads with the date and time.

BODY BUILDING BY EXPERTS

Know-how and expertise from professionals

PALFINGER body builders and the Mounting Competence Center get the maximum performance out of every TEC crane with a well thought-out vehicle body. Carefully matched individual components create a complete overall solution.

PALFINGER EQUIPMENT

Perfectly coordinated crane tools for more efficient, more comfortable and safer work

We know - our customers are professionals, and professionals will only be satisfied with the best equipment to make TEC cranes a multifunctional solution. No matter what the application is, if required, we have the right equipment for the perfect overall solution.

STRONG SERVICE PARTNER WORLDWIDE

A STRONG NETWORK FOR BIG TASKS

For PALFINGER, as a premium manufacturer, service means more than technical support, service is our promise of quality. Our partners are continuously trained and evaluated to count always on the highest service quality. We take care of the fastest possible availability of spare parts and the development of digital tools that make everyday working life easier. Your success is important to us. In order to meet the expectations of our customers, our partners and we are around the globe available with around 5,000 service points.

PALFINGER SERVICE CONTRACTS MAXIMIZE YOUR UPTIME

TAILORED TO YOUR NEEDS

To optimize your business performance, by reducing machine downtimes and repairs costs, we offer you the PALFINGER Service Contracts from 1 to 6 years.

	 PURE	 PERFORM	 PRO	 PRIME
Oil Maintenance	●	●	●	●
Regular Service	—	●	●	●
Legal Inspection *	—	●	●	●
Connected Premium**	○	○	●	●

Wear Parts Service	—	—	—	●
Monthly Maintenance	—	—	—	○

● Standard ○ Optional — Not available

*Legal inspection subject to country specific laws.
**Hardware to be purchased with product, availability for your product has to be checked.

Our goal is to offer prevention and backup with complete cost transparency. You can plan your expenditure and do not have to worry about unforeseen workshop costs. We simplify your processes and allow you to focus on your core business.

THE BENEFITS AT A GLANCE

- Outsourced service with an authorized PALFINGER workshop
- Boost product uptime with preventive maintenance
- Full control and transparency of ongoing costs
- Increased resale value
- Maximised product turnover
- Reduced product life costs up to 37 % when your product is protected with a full PALFINGER Service Contract
- Extended product service life

LIFTING CAPACITY DIAGRAMS

TECHNICAL SPECIFICATIONS

EN 12999 HC1 HD5/S1

Max. lifting moment	95.0 mt / 932.1 kNm
Max. lifting capacity	30,000 kg / 294.3 kN
Max. hydraulic outreach	22.4 m
Max. outreach with fly jib and mech. extension (JV1)	37.2 m
Slewing angle	continuous
Slewing torque	9.1 mt / 88.9 kNm
Stabilizer spread (Std.)	8.8 m
Fitting space required (Std.)	1.72 m
Crane width folded	2.55 m
Max. operating pressure	385 bar
Recommended pump capacity	from 110 l/min to 130 l/min
Dead weight (Std.)	7,480 kg
