MyPal Recruiting is a cloud solution that PALFINGER procures from an **external service provider** (processor). PALFINGER also uses external service providers for the development and technical support of the system. They have access to your data as part of their service. These processors are software development companies based within the European Economic Area. PALFINGER always selects its service providers carefully and contractually obliges them to handle the transferred data in compliance with data protection regulations. The service providers are bound by our instructions and are checked for compliance with their guaranteed security measures.

Within the PALFINGER Group and when using external service providers, **your data** may be **transferred to another country**. Right to information: On request, we will be happy to provide you with information free of charge about the data processed in relation to your person. To do so, please contact us at dataprotection@palfinger.com, by post or using our [web form](#).

Right to rectification: If, despite our efforts to ensure that your personal data is correct and up to date, incorrect personal data is stored, we will rectify it at your request.

7. FURTHER FUNCTIONS OF OUR PLATFORM

7.1. Notification service about vacancies

You can activate a notification service via your applicant profile, which will inform you by e-mail about jobs vacancies at PALFINGER, provided they match the search criteria you have entered. The search criteria can be adjusted in the options of your profile. You can also deactivate the service at any time.

7.2. "Quick Apply" function

The "Quick Apply" function makes it possible to **apply without prior registration** in the career portal. The feature is provided by a software development company as an external service provider based within the European Economic Area.

All you need to do is upload your CV. It will then get automatically parsed, meaning the relevant applicant data such as first name, surname, e-mail address and postal address are extracted from the CV and transferred to the corresponding form fields of the application. It is possible to correct the data before submitting the application.

An applicant profile will be automatically created for you in the career portal and you will receive a confirmation email with your access data. You can then manage your profile yourself.

Apart from that your data will be processed as indicated.

8. SECURITY OF YOUR DATA and AUTOMATED DECISION-MAKING

PALFINGER uses technical and organizational measures to protect the integrity, confidentiality, security and availability of your data. The rights protection also depends on you. If we have given you (or if you have chosen) a password to access our career portal, you are responsible for keeping this password confidential. We ask you not to disclose your password to third parties.

No automated decision-making takes place in the entire personnel selection process.

9. COUNTRY-SPECIFIC REGULATIONS

Depending on the country in which the PALFINGER company to which you are applying is located, additional regulations may apply in accordance with local data protection laws.

Please note the following special regulations in addition to the information already provided!
